

4Dent Tube is now upgraded with new properties

11/02/2010 14:10 by Egydentist

4Dent Tube is translated into 17 languages and supports easy translation into any other language. Existing translations include: Albanian, Arabic, Bulgarian, Danish, Dutch, French, German, Georgian, Italian, Lithuanian, Portuguese, Romanian, Russian, Serbian, Spanish, Swedish and Turkish.

You'll be able to include any online videos into 4Dent Tube. No matter what the source is, 4Dent Tube can embed it. A positive 'side-effect' is that you can also embed mp3/audio Lectures or flash presentations in swf. We introduced a comprehensive article manager. With build-in features such as the WYSIWYG editor, image uploader, RSS, and comments as well as editors support, you can maintain a flexible publishing platform. Upload any of the supported video types: *.FLV, *.AVI, *.MKV, *.DIVX *.MOV, *.WMV and *.MP4.

4Dent Tube has a lot of dynamic and ajaxy features however our favorite feature must be the 'Lights Off' button that allows your visitors to turn off the lights while viewing videos. This same feature was introduced by Youtube.com on their site earlier in 2009.
